

THIS DECK ROCKS!

Here's an example of an innovative design that performs better thanks to MoistureShield®. The guitar deck is a larger-than-life version of a six-string acoustic guitar in which the guitar's body forms the main part of the deck, while access to the shore is via the neck. MoistureShield® Vantage Collection® composite boards were used, along with our new Deck Lights and Hidden Fasteners. MoistureShield was instrumental to the design because it's the only decking product that can be installed on or in the ground or underwater without voiding the warranty. Plus the ability to custom cut and shape our boards creates a more realistic guitar tone.

So if you're looking for beautiful, durable decking with no strings attached, don't fret, choose MoistureShield® Composite Decking.

ACROSS THE BOARD

Here's even more that MoistureShield® has to offer:

- **MoistureShield® Vantage Collection®** - our high-performance, easy-to-install, reversible boards
- **MoistureShield® Pro** - our new cap stock line featuring an extra layer of protection and beauty
- **MoistureShield® Deck Clips** - concealed fasteners allows for an unblemished deck surface
- **MoistureShield® Pro Aluminum Railing** - adds a contemporary edge to any deck design
- **MoistureShield® Deck Lights** - LED deck lights brighten any deck design
