The structural limited warranty (the “Structural Warranty”) for MoistureShield composite decking used in residential decking construction (the “Product”) applies to the original consumer purchaser or the first subsequent owner registered transferee of the residence on which the Product is installed. This Structural Warranty covers decks installed within North America and warrants the Product (i) to be free from defects in material and manufacture and, (ii) when used for its intended purpose and properly installed and maintained according to MoistureShield’s published installation instructions to (a) resist rot and (b) resist damage caused by insect or termite attacks. To be specific: this product resists rot and insect damage, but it is not rot or insect proof.

The term of this Structural Warranty shall be fifty (50) years from the date of original purchase for a residential application. If the Product fails to conform to this Structural Warranty during the first year after the Product is sold, MoistureShield in its sole discretion shall replace the defective Product and/or reimburse the homeowner for all or a portion of the product at the sole discretion of MoistureShield based on extent of defectiveness of the product, as determined by MoistureShield. For example: if the purchaser makes a warranty claim in year five of the warranty period, the maximum eligible value of the warranty replacement materials or refund payment shall be the original purchase price reduced by 8% (2% times four years – years 2, 3,4, and 5).

Inspect all materials carefully before installation. Warranties do not cover materials with visible defects once they are installed. It is the responsibility of the installer/owner to determine if the job-site conditions are environmentally acceptable and that the sub-structure system is acceptable for the installation of composite decking. MoistureShield declines any responsibility for composite decking failures or problems associated with or resulting from sub-surface structural or environmental deficiencies or job-site damage after the composite decking has been installed.

The Product must be installed according to MoistureShield’s printed installation instructions and all building codes adopted by federal, state or local governments or government agencies and applicable to the installation.
