

Versatile. Durable. Dependable.

Our uncapped composite board, Vantage performs like real wood — cutting, ripping and bending while still maintaining its integrity*. Providing unbeatable moisture protection with The Solid Core Difference that enables our decking to be installed on the ground, in the ground or underwater by creating an impermeable barrier that also fights damage from rot, insects and other harmful elements, Vantage deck boards are engineered to ensure protection without a cap. With self-healing properties that help minimize the appearance of scuffs and scratches, Vantage reversible boards feature the same wood grain texture on both sides for easier installation.
