

GET OUTSIDE THE EVERYDAY

Sustainability Matters

MoistureShield is committed to working towards a cleaner, waste-free world.

That's why we build our decking boards* with **95% recycled content**, much of it material that we help divert from landfills. 100% of the wood we use is recycled, so no trees are cut down to make our product. That's more than 65 million pounds of wood fiber we recycle every year, or the equivalent of more than 15,000 trees. 25% of the plastic we use comes from post-consumer waste — like plastic bags and bottles — so they become part of beautiful decks rather than landfills or pollution.

Because we believe in being part of the sustainability solution, we choose to reuse materials to make new, better things.

**Does not include Stratos Composite Enhanced PVC Decking.*

Build Green with MoistureShield

Our decking contributes to LEED green building certifications with over 95% recycled material.

● Pre-consumer recycled content

● Post-consumer recycled content

SCAN
for more

The average American uses **110 pounds** of single-use plastic every year.

We take the waste of about **250,000 Americans** and use it to create our high-performance decking.

THAT'S 125 MILLION POUNDS
of wood fiber, plastic regrind, rigid plastics and film plastics we divert from landfills every year.

(More than two Statues of Liberty!)

Excel Every Day. Product innovations that improve your everyday life, offering enduring beauty that reduces the need for routine maintenance.

Defy Ordinary. Built to outlast the elements, our wood composite deck boards can be installed on the ground, in the ground or underwater.

Inspire Life. Create inspired outdoor living spaces, from the social spot to the play area, with gorgeous finishes and unmatched performance.

zerO Failures

We're the only decking product with zero structural field failures for more than 30 years. Visit our website to learn more about why that matters and how we stack up against the competition. MoistureShield.com/Why-MoistureShield

A person in a green jacket and dark pants is rappelling down a rope from a wooden platform. The platform has curved, tiered edges. In the background, there is a vast mountain valley with steep cliffs and a forested area. The sky is hazy with some clouds. The text "Excel Every Day" is overlaid on the lower left of the image.

Deck Style Meets Lifestyle

This product overview guide is designed as a quick reference to help you understand which of our products may best meet your needs. For example, families in hot climates and with young children will want to choose products with our CoolDeck Technology. If you have a rustic, wood-heavy interior design or you live in a forested environment, our Meridian decking will pair beautifully. Heavily-trafficked decks should be made with our Vision or Stratos decking.

Consider the following questions before choosing the right decking:

- ☐ Do you have young children or pets?
Choose Stratos, Vision or Vantage for high slip resistance.
- ☐ Does your region experience many hot summer days?
Choose Stratos, Vision or Meridian with CoolDeck.
- ☐ What kind of style do you have in your home?
For a rustic look and feel, choose Vision or Vantage.
For modern, refined colors, choose Elevate, Meridian or Stratos.
- ☐ How often do you entertain large groups?
For heavy foot traffic, choose Vision or Stratos.
- ☐ Are you designing a home dock or pier?
For highest durability, choose Vision Marine Grade 2x or Stratos. For an authentic wood look, choose Vantage Marine Grade 2x.
- ☐ Are you interested in decking that will last for many years and is low maintenance, but are also concerned about staying within your budget?
Choose Elevate. Its scalloped bottom reduces cost while still offering our Solid Core protection giving it the same 50-Year Structural warranty that is available on all MoistureShield's decking lines.

Stratos with CoolDeck Technology

Meticulously designed to be stronger and longer-spanning than any PVC decking on the market

Vision with CoolDeck Technology

Extremely durable decking built for bare feet, pet claws, summer heat and sports cleats

Elevate

Affordable and high-performing composite decking with a strong, protective barrier

Meridian with CoolDeck Technology

Authentic premium wood look with colors built to keep even the hottest weather at bay

Vantage

Specialty decking that imitates real wood but resists damage from water and harmful elements

EXPERIENCE THE NEXT LEVEL

Introducing
StratosTM
Composite Enhanced PVC

Dive in and experience the next level in outdoor living. MoistureShield Stratos is the only deck board that fuses the impenetrable protection and beauty of PVC decking with the rigid strength of composite. It's the newest way we're pushing the limits of what's possible in outdoor living.

Get Outside the Everyday

PVC Decking Just Got Better

MoistureShield's Stratos composite enhanced PVC decking is a breakthrough innovation in outdoor flooring technology. Featuring the best of composites and PVC decking, our groundbreaking Next Core™ is meticulously designed to be stronger and longer-spanning than any PVC decking on the market. Our composite enhanced PVC has lower expansion at higher temperatures than conventional PVC decking products. That means pros can finish with tighter details across wider spans than ever and deliver decks that stay looking great for years after installation.

Comfort.

CoolDeck® Technology

Finally, composite decking that stays comfortable all season long, when every degree counts. On a hot summer day, a deck can reach temperatures of more than 160°F. That's why we designed composite enhanced PVC decking that helps reduce heat up to 35%*, staying cooler in extreme heat.

* Reduces heat absorption by up to 35% compared to standard capped PVC composites in a similar color. CoolDeck Technology is available in the Stratos line in all colors.

Beauty.

TruTexture™ Surface

Our proprietary TruTexture coating utilizes advanced techniques to deliver lower pattern repetition, rich color variegation and a realistic wood grain texture in each decking board. And with added scratch resistance, you'll spend less time on maintenance and more time enjoying your backyard sanctuary.

Strength.

50% Greater Span

The strongest deck board in its class, providing greater rigidity and a more solid feel underfoot compared to conventional PVC and composite decking, even when installed 24" on center.

Stratos™

Composite Enhanced PVC Decking

Inspired. Resilient. Revolutionary.

Stratos composite enhanced PVC decking features our groundbreaking Next Core making our deck boards stronger and longer-spanning than any PVC decking on the market. Engineered with a 50% greater span to provide rigidity and a more solid feel, Stratos features our TruTexture Surface for a true wood grain finish. With CoolDeck Technology reducing heat up to 35%* and a proprietary acrylic cap providing a strong defense against stains, scratches and impact.

* Compared to standard capped PVC composites in similar color.

Athena

The Solid Core Difference

MoistureShield offers the only wood composite boards in the industry that can be installed on the ground, in the ground or underwater without any structural performance issues. At the foundation of every board is our proprietary Solid Core — an impermeable barrier that fights damage from moisture, rot, insects and other harmful elements. Our core maintains its integrity even after ripping and cutting, mitigating warranty issues and long-term damage.

Choose Solid Core and create outdoor spaces that stand up to the effects of weather and wear — day in and day out.

Comfort.

CoolDeck® Technology

Finally, composite decking that stays comfortable all season long, when every degree counts. On a hot summer day, a deck can reach temperatures of more than 160°F. That's why we designed composite wood decking that helps reduce heat up to 35%*, staying cooler in extreme heat.

* Reduces heat absorption by up to 35% compared to standard capped composites in a similar color. CoolDeck Technology is available in select colors in the Vision and Meridian lines.

Durability.

DiamondDefense™ Coating

You choose composite decking to avoid maintenance like painting and staining, so why settle for products that scratch or chip on impact? Our DiamondDefense Coating creates the strongest capped wood composite board on the market to protect your deck against everyday damage to stay looking like new for longer.

Beauty.

TruTexture™ Surface

Our proprietary TruTexture coating utilizes advanced techniques to deliver lower pattern repetition, rich color variegation and a realistic wood grain texture in each composite decking board. And with added scratch resistance, you'll spend less time on maintenance and more time enjoying your backyard sanctuary.

Vision®

Capped Wood Composite Decking

Bold. Refined. Infinite.

Step up to the future of decking with our strongest capped wood composite board. Vision provides unbeatable moisture protection with our proprietary Solid Core Difference that enables our decking to be installed on the ground, in the ground or underwater by creating an impermeable barrier that also fights damage from rot, insects and other harmful elements. With our exclusive DiamondDefense Coating that resists scratches, stains and fading, Vision deck boards also feature CoolDeck Technology that reduces heat absorption up to 35%.* Choose from beautiful colors and textures that reflect the look of real hardwood while ensuring unmatched performance that is designed to last a lifetime.

* Reduces heat absorption by up to 35% compared to standard capped composites in a similar color.

Vantage™

Wood Composite Decking

Versatile. Durable. Dependable.

Our uncapped composite board, Vantage, performs like real wood — cutting, ripping and bending while still maintaining its integrity.* Providing unbeatable moisture protection with our proprietary Solid Core Difference that enables our decking to be installed on the ground, in the ground or underwater by creating an impermeable barrier that also fights damage from rot, insects and other harmful elements, Vantage deck boards are engineered to ensure protection without a cap. With self-healing properties that help minimize the appearance of scuffs and scratches, Vantage reversible boards feature the same wood grain texture on both sides for easier installation.

*Due to high wood fiber content and uncapped construction, Vantage boards will weather and lighten in color just like authentic wood decking.

- **Made in the USA with 95% recycled material**
- **20-Year Commercial Limited Structural Warranty and Transferable 50-Year Residential Structural Warranty**
- **Matte finish**
- **1" x 6" boards available in 12', 16' and 20' lengths**

Cladding

Exterior Facade Options

Enhance the architectural detail of your facade while enjoying the benefits of a low maintenance material by using MoistureShield's Vision or Meridian composite decking for your cladding needs.

Our beautiful color options and textures reflect the look and feel of real hardwood, but have the performance of an impermeable barrier of wood fibers encapsulated in plastic.

MoistureShield is the only composite decking approved for cladding that offers 360-degree protection to the core to fight damage from moisture, rot, insects and the elements.

- **No warping or rotting**
- **Zero structural field failures in 30+ years**
- **Virtually no moisture absorption**
- **Resists damage from insects**
- **ICC-ES AC524 compliant**

Zero Structural Field Failures in 30+ Years

CoolDeck® Technology

Cladding

Exterior Facade Options

Our resilient, color-enriched composite cladding evokes the look and feel of real hardwood, with authentic wood grain textures and reduced pattern repetition. Except unlike real wood, composite cladding is made to withstand the elements, providing a natural look that doesn't require staining or painting.

And since MoistureShield Vision and Meridian composite decking is made with 95% recycled content, you are eligible to earn credit in LEED green building rating programs when using it in cladding applications — enabling you to make an environmental impact as well as an architectural statement.

Composite boards from both our Vision and Meridian product lines lend themselves to beautiful, durable exterior cladding installations.

For color availability in your region, please contact your MoistureShield representative.

InstaDeck®

Outdoor Flooring System

MoistureShield's InstaDeck is an outdoor flooring system comprised of heavy-duty plastic tiles that easily snap together to create a foundation for a freestanding, ground-level deck. InstaDeck is a great alternative to traditional decks and can be assembled on any flat surface, using minimal tools.

With an integrated fastening system that is compatible with MoistureShield's Vision, Meridian, Elevate and Vantage grooved composite decking, InstaDeck can create any size or shape deck and does not require screws to attach deck boards. Once the locking tile foundation is arranged and deck boards are trimmed to size, simply step on boards to lock them securely into place. The flooring system has a finished height of 60mm (2 $\frac{3}{8}$ ") that is compatible with select Belgard® pavers, allowing for greater creativity with materials and design.

- **Create any size deck using locking tile foundation**
- **Minimal tools required for easy installation**
- **Compatible with 60mm (2 $\frac{3}{8}$ ") pavers to combine decking and hardscape**
- **Assemble on any flat surface: grass, concrete, existing patio surfaces and gravel**
- **Tiles can be offset around obstacles and existing hardscape or concrete**
- **Made in the USA with Limited Lifetime Warranty**

2' x 2' InstaDeck (set of 4)
Actual dimensions 22.55" x 22.55"

Joist Tape

Added Protection for Longevity

When you choose deck boards protected with the Solid Core Difference, don't let your substructure go unprotected. Ensure every inch of your deck is designed to defy the elements with joist protection tape from MoistureShield. Its patented acrylic adhesive and woven cloth substrate create a tight seal over your deck joists and deck screws to prevent moisture infiltration. MoistureShield Joist Tape tears easily without tools, doesn't stick to itself and can be repositioned without leaving a residue, making it incredibly easy to work with on any substrate material — including lumber and steel.

MoistureShield Joist Tape is available in 2", 4" and 6" widths in 65' long rolls to accommodate your needs.

- Using deck joist tape adds up to 10+ years to the life of your deck
- Tears easily by hand without tools for easy handling on the job site
- Seals tightly around deck screws, preventing moisture infiltration and corrosion
- For application temperatures between -20°F to 200°F (-29°C and 93°C)

3 Sizes (available in black only):

2" Joist Tape
2" width x 65' length

4" Joist Tape
4" width x 65' length

6" Joist Tape
6" width x 65' length

MoistureShield Deck Clip

Metal Hidden Deck Fastener

Get the most seamless installation possible with our exclusive hidden fasteners. Designed specifically for our wood composite boards, these fasteners provide superior holding power that fits securely into grooved profiles. Hidden fasteners can even add to the life of your deck by elevating the boards off the joists to reduce structural rot and mold. They're backed by a Limited Lifetime Warranty against any loose deck boards.

Benefits of our hidden deck fasteners include:

- Easy to install with pneumatic fasteners or screws
- Concealed fasteners create an unblemished deck surface
- Allows joists to completely dry out — reducing structural rot or mold
- Powder coated high strength steel or stainless steel

Standard Clip Packs include black-coated carbon steel clips and screws. Stainless steel kits include black-coated 304 grade stainless steel clips and screws which are approved for coastal applications.

NOTE: Traditional face screws can also be used.

Fastener Options:

Complete System: Covers 50 Square Feet of Decking

- Includes 90 clips, 5 starter clips, 5 finish clips and 100 screws
- Available in hand drive

Contractor Pack: Covers 250 Square Feet of Decking

- Includes 450 clips and 500 pneumatic nail screws
- (Starter and finisher clips are sold separately)

Deck Clip Pack: Covers 250 Square Feet of Decking

- Includes 450 clips and 500 regular screws
- (Starter and finisher clips are sold separately)

Starter Clip Pack: 25 Starter Clips with 25 Screws

- Starter clips are used to fasten the first deck board to the ledger board
- (Estimated need for 250 square foot deck)

Finisher Clip Pack: 25 Finish Clips with 25 Screws

- Finish clips fasten the last deck boards
- (Estimated need for 250 square foot deck)

Transition Clip Pack: 25 Transition Clips with 25 Screws

- Transition clips are used for picture frame decking and repair

For Installation: Hand Drive or Pneumatic Hidden Installation Tool

AEGIS♦CLIP™

Plastic Hidden Deck Fastener

MoistureShield's Aegis Clip offers a 90-degree installation process and fastener options designed to be used on wood or steel joist systems. The teeth on the bottom of the clip bite into the grooved deck board to help control lateral movement of the deck boards. Made from glass reinforced polypropylene for lasting strength and durability.

Benefits of the Aegis Clip deck fastener include:

- Concealed fasteners create an unblemished deck surface
- Beveled edges and pre-inserted screws for easy installation
- Clip teeth bite into the groove to help control lateral movement
- Approved for ACQ joists and all other PT joists

Fastener Options:

50 Square Foot Box

- Includes: 90 fasteners with pre-inserted screws, T-15 Star driver bit and instruction sheet

250 Square Foot Bucket

- Includes: 450 fasteners with pre-inserted screws, T-15 Star driver bit and instruction sheet

Stainless steel screws for wood and steel substructures available in both package sizes. Carbon steel screws for wood substructure available in both package sizes.

Clip Box and Bucket coverage based on 16" o.c. installation.

Railing Style Meets Lifestyle

This product overview guide is designed as a quick reference to help you understand which of our railing systems may best meet your needs. For example, homeowners with waterfront properties, may opt for our Navigator, Discovery or Traverse line of composite railing while those in drier climates may want to explore our Fathom steel railing styles. Our rust-resistant Compass aluminum railing includes a cable infill option for a more open and modern design.

Consider the following questions before choosing the right railing:

- ☐ Will your railing be installed near the ocean?

For protection against moisture and saltwater, choose from our water-resistant Solid Core composite railing (Traverse, Discover or Navigator) or Compass Aluminum Railing that features a durable powder coat.

- ☐ Do you want to accentuate your view?

Railing with cable infills maintain open views. Choose Compass Aluminum Railing or our premium Navigator line of composite railing — both available with cable infill. Our Fathom Steel Railing also offers a horizontal rod infill option.

- ☐ Looking to create a flat “cocktail rail” for entertaining?

Choose Compass Aluminum Railing, Discovery Composite Railing or Fathom Steel Railing — all three offer a deck board adapter to create a cohesive aesthetic.

- ☐ Are you a trendsetter looking to turn heads?

Choose Navigator Composite Railing’s new Satin Black color and let your railing be on trend with other exterior black products — like windows, doors and trim.

- ☐ Are you on a tight budget?

Choose Fathom Steel Railing — a solid choice that stands up to the elements and to your wallet.

Compass Aluminum Railing

Featuring a premium powder coat that exceeds industry standards for unparalleled durability

Fathom Steel Railing

A choice for residential and commercial applications with strength and style

Navigator Composite Railing

Get the look and feel of real wood with an acrylic cap to defend against scratching and impact

Discovery Composite Railing

Made with a strong material composition to protect your railing from damage inside and out

Traverse Composite Railing

Style and protection for your outdoor space, with a smooth vinyl cap for ease of maintenance

Solid Core Composite Railing

MoistureShield's Solid Core composite railing contains no wood fibers. It is designed to be water-resistant like our composite decking providing the look and feel of real wood. With a strong material composition at its core that fights damage from rot, insects and other harmful elements and an acrylic cap, our railing maintains its integrity even after ripping and cutting, mitigating warranty issues and long-term damage.

Choose Solid Core Composite Railing and create outdoor spaces that stand up to the effects of weather and wear — day in and day out.

Strong material composition resists water and fights damage

No Warping or Rotting

Resists Damage from Insects

Security.

Connex™ Technology

Our patented locking strip secures railing by connecting rails and pickets from the inside out — also providing a clean design.

Durability.

3X Powder Coat

Our powder coat performs at three times the industry standard using a proprietary powder formulation that meets and exceeds AAMA 2604.

Support.

Industry-Leading Warranty

Our railing systems feature comprehensive coverage to help you create worry-free outdoor living environments that stand strong and beautiful for years.

Compass™

Aluminum Railing

Prevailing. Flawless. Guided.

Rust-resistant, aluminum Compass Railing features a premium powder coat that exceeds industry standards, providing unparalleled durability while pre-assembled panels utilize our patented Connex technology to ensure secure connections. Available with two top rail profiles and with an optional deck board adapter to create a flat “cocktail rail” enabling a matching deck board to be used for a cohesive aesthetic. A unique 2-to-3 Rail Adapter (sold separately) can create a distinctive three rail design that elevates Compass Railing to the next level. Available in three finishes with matching square balusters or stainless-steel cables and featuring end caps that conceal rail cuts for a clean, polished look.

- **Rust-resistant with premium powder coat**
- **Pre-assembled, true-to-length panels**
- **Code compliant**
- **Assembled in the USA with Transferable Limited Lifetime Warranty**
- **Level Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Stair Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Aluminum ADA Handrail to complement railing while adding safety and accessibility**

Fathom™

Steel Railing

Formidable. Rooted. Steadfast.

A solid choice that stands up to the elements, Fathom Railing provides the strength of steel with enduring style for both residential and commercial applications. Available with traditional vertical square balusters or modern horizontal rods, Fathom Railing panels come factory welded and fully assembled with pre-attached brackets for easy installation. Featuring a premium powder coating for added protection against the elements and available in two distinctive colors — textured matte black and hammered bronze.

- **Premium powder coat**
- **Code compliant with 2" or 4" bottom spacing**
- **Transferable 15-Year Limited Warranty**
- **Level Rail Kits: Available in 36" or 42" heights and 6', 8' or 10' lengths**
- **Stair Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Aluminum ADA Handrail to complement railing while adding safety and accessibility**

Navigator™

Solid Core Composite Railing

Exceptional. Bold. Distinguished.

Designed to be water-resistant like MoistureShield's composite decking, our premium Navigator line of Solid Core Railing offers the look and feel of real wood. With a strong material composition at its core that fights damage from rot, insects and other harmful elements and an acrylic cap, the Navigator boasts three distinctive top rail options along with chamfered posts and balusters. A seamless rail combined with a unique hidden bracket system that conceals fasteners provides a craftsman-like install and modern, clean aesthetic. Available with three infill options — square balusters, black round aluminum balusters or stainless-steel cable.

- **Looks and feels like painted wood**
- **True-to-length panels**
- **Architectural detailing on balusters and posts**
- **Paintable acrylic cap**
- **Hidden bracket system**
- **Code compliant**
- **Made in the USA with Transferable Limited Lifetime Warranty**
- **Level Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Stair Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Vinyl and aluminum ADA Handrail to complement railing while adding safety and accessibility**

Discovery™

Solid Core Composite Railing

Classic. Enduring. Inspired.

Designed to be water-resistant like MoistureShield's composite decking, our Discovery line of Solid Core Railing features a strong material composition at its core that fights damage from rot, insects and other harmful elements. Standard kits feature a traditional bread loaf profile for the top rail with a vinyl cap for ease of maintenance, but an optional deck board adapter easily creates a flat "cocktail rail" to coordinate with decking. Concealed fasteners combined with a smooth glossy finish provide a clean, polished aesthetic that is easy to maintain. Available in three colors with square vinyl or black round aluminum baluster infills.

- **Looks and feels like painted wood**
- **On-center panels**
- **Concealed fasteners**
- **Code compliant**
- **Made in the USA with Transferable Limited Lifetime Warranty**
- **Level Rail Kits: Available in 36" or 42" heights and 6', 8' or 10' lengths**
- **Stair Rail Kits: Available in 36" or 42" heights and 6' or 8' lengths**
- **Vinyl ADA Handrail to complement railing while adding safety and accessibility**

Traverse™

Solid Core Composite Railing

Timeless. Elegant. Pure.

Designed to be water-resistant like MoistureShield's composite decking, our Traverse line of Solid Core Railing features a strong material composition at its core that fights damage from rot, insects and other harmful elements. With a smooth, contemporary T-Rail profile and vinyl cap for ease of maintenance, Traverse railing comes with concealed fasteners that provide a clean, polished aesthetic. Available in three color options — including an exclusive gray — with square vinyl or black round aluminum balusters, Traverse offers the flexibility to suit any home's style.

- **Looks and feels like painted wood**
- **True-to-length panels**
- **Concealed fasteners**
- **Code compliant**
- **Made in the USA with Transferable Limited Lifetime Warranty**
- **Level Rail Kits: Available in 36" or 42" heights and 6', 8' or 10' lengths**

Lighting

Improved Safety and Ambiance

Solar post caps and a full LED lighting system are available for use with all MoistureShield railing products. Under-rail LED lighting strips feature an adhesive backing and easily connect with a 50W Bluetooth compatible transformer. Additional LED accessories include post caps, dome lights, flush deck and side/stair lights.

- **LED plug-and-play lighting system does not require cutting or splicing of wires**
- **Long-lasting, true white LED lights — rated at 50,000 hours**
- **Color matched post caps available for most railing styles**
- **Adjust and control lighting with smartphone***
- **Limited Warranty**

* Transformer is Bluetooth compatible; "SmartPower50" app available from the App Store and Google Play.

Posts & Accessories

Finishing Touches

Railing accessories include Post Sleeves and Wraps, Structural Posts, Porch Posts, Lighting Accessories, Gates, Post Caps and Trim Rings. These items are compatible with select MoistureShield railing systems and provide a finishing touch to your outdoor project.

- **Vinyl and aluminum ADA Handrail to complement railing while adding safety and accessibility**
- **Structural Posts for both surface mount and fascia mount applications**
- **PVC Post Sleeves and Wraps can be used over wood or steel posts**
- **Porch Posts — Aluminum and vinyl options for weight supporting column application**
- **Post Caps and Trim Rings — Color-matched available for most railing styles**
- **Gates — Fit railing openings between 36" and 48" wide with gate hardware available**
