WHY MOISTURE

Excel. Defy. Inspire.

Excel Every Day.

Product innovations that improve your everyday life, offering enduring beauty that reduces the need for routine maintenance.

Defy Limits.

Built to withstand real life and extreme elements, our deck boards can be installed on the ground, in the ground or underwater.

Inspire Life.

Create inspired outdoor living spaces, from the social spot to the play area, with gorgeous finishes and unmatched performance.

RESHIELD

Perform. Defend. Endure.

Zero Structural Field Failures in 30+ Years

Our products have stood up to the elements for more than 30 years with no structural field failures.

Industry Leading Warranties

All of our decking products are backed by a 50-year residential structural warranty. Our goal is to create worry-free outdoor living that lasts a lifetime. Learn more at MoistureShield.com/warranty.

Made in the USA

Our decking and composite railing products are proudly made in the USA and backed by decades of proven performance, MoistureShield inspires bold outdoor spaces engineered to endure.

GET INSPIRED

Top Trends

Seamless Indoor-Outdoor Flow

Outdoor spaces are becoming increasingly more like a natural extension of interior living spaces. This can be accomplished with colors, textures, shapes and materials that mimic the interior of the home.

Earthy, Nature-First Palettes

Warm, nature-inspired deck tones and wood-look composites are trending as homeowners look for low-maintenance outdoor spaces that blend into the landscape.

Biophilic Spaces With Big Views

Clean-lined deck boards, slim railings and integrated greenery support biophilic design by keeping sightlines open and the focus on sky, trees and water.

Multi-Tasking Outdoor Rooms

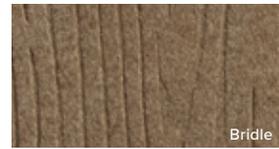

Decks now serve as dining, lounging, work and wellness zones in one, so durable composite decking is doing more than ever as the everyday foundation of how people live in their homes.

THE DECK YOU DESERVE

MoistureShield decking offers a range of composite deck boards that stand up to wood in every way, and in every possible application. The only decking in the industry that can be installed on the ground, in the ground or underwater without any structural performance issues.

vs.

Wood Decking

Superior Durability

Decking built to last. Won't splinter and resists damage from moisture, rot and insects.

Ultra Low-Maintenance

Our decking is fade/stain-resistant and stands up to the elements so you can focus on enjoying your deck, not working on it.

Lifetime Value

Our decking lasts significantly longer and requires no ongoing maintenance compared to wood, resulting in better lifetime value.

Industry-Leading Warranties

Structural and fade & stain warranties protect your investment.

Environmentally Friendly

Made with 95% recycled materials, our wood composite decking supports conservation and doesn't rely on virgin timber.

Rots, Warps, and Splinters

Exposure to weather heavily damages wood, affecting your deck's appearance and performance.

Ongoing Maintenance

Requires constant upkeep due to fading and moisture absorption, with a shorter lifespan and eventual complete replacement.

Perceived Value

Lower upfront cost seems like a good value, but upkeep, repair and replacement over time makes it the more costly option.

Limited Coverage

Most wood products have no warranty at all.

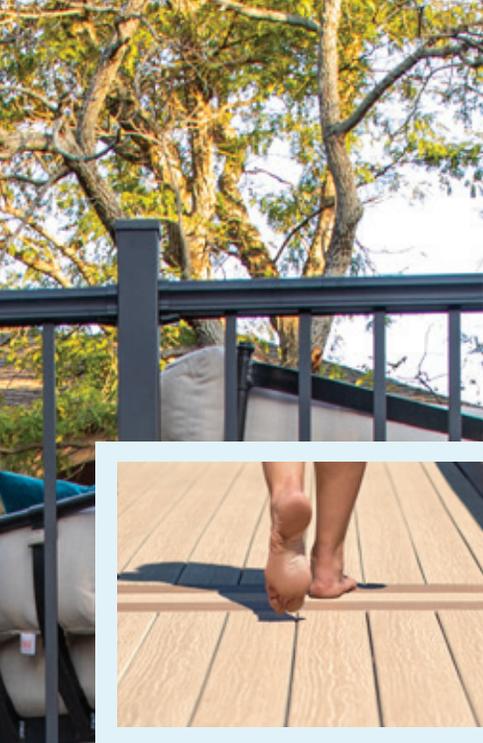

Environmentally Harmful

Wood sourcing varies widely and can contribute to deforestation when logging isn't responsibly managed.

INNOVATION IS AT OUR CORE

From our unrivaled composite core technologies to decking that stays cooler in the sun, our products are engineered to deliver more comfort, beauty and long-lasting protection.

Decking Innovations

The Solid Core Difference

An impermeable barrier that fights damage from moisture, rot, insects and other harmful elements.

CoolDeck® Technology

Heat mitigating technology keeps boards up to 30° cooler than leading competitors' composite and PVC deck boards.†

TruTexture™ Surface

True wood grain finish, added scratch resistance and enriched color variegation for authentic, long-lasting beauty.

DiamondDefense™ Coating

Creates the strongest composite cap in the industry to resist damage from scratches, stains and fading.

Railing Innovations

The Solid Core Difference

An impermeable barrier that fights damage from moisture, rot, insects and other harmful elements.

Powder Coat Protection

Performs at three times the industry standard.

Connex™

Patented locking strip ensures secure connections.

Meridian in Catalina with
Compass railing in Matte Black.

†When compared to competitor's deck boards of similar or lighter brightness (L* value)

COMPOSITE DECKING

Only MoistureShield composite decking puts an impermeable solid core at the center of every board for proven performance season after season no matter where it's installed, including on the ground, in the ground, or even under water.

Vision[®]

Capped Composite Decking

pg. 14

Our highest-performing composite decking with a dimensional hardwood style and premium, low-maintenance features that bring your vision to life.

Meridian[™]

Capped Composite Decking

pg. 16

Advanced composite decking featuring a tailored look and enriched color blends for elevated style and enhanced performance.

Vantage[™]

Uncapped Composite Decking

pg. 18

Classic composite decking with the authentic texture and workability of wood paired with the durability and value of MoistureShield.

Elevate[™]

Capped Composite Decking

pg. 20

Enhanced composite decking that combines versatile design choices, reliable protection, and accessible value.

Vision[®]

Capped Composite Decking

The Solid Core Difference

CoolDeck[®] Technology

DiamondDefense[™] Coating

Zero Structural Field Failures in 30+ Years

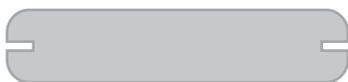

Slip Resistance

Marine Grade Spans 24"

It's time to step up to the future of composite decking. Vision, our strongest capped wood composite board, features reduced heat absorption and an enhanced finish with distinctive style that is comfortable underfoot and resistant to scratches, stains and impact.

The Look of Wood, Without the Upkeep

Enjoy a beautiful low-maintenance facade by using Vision® or Meridian™ composite decking as wall cladding. Multiple color options and textures reflect the look and feel of real hardwood combined with impermeable protection against damage from moisture, rot, insects and the elements.

Sustainability in Every Board

Make an architectural statement with a lighter environmental footprint. Our wood composite boards contain 95% recycled content and can also help earn credit toward LEED® green building rating programs.

- Authentic wood grain textures
- Multiple aesthetic options with resistance to moisture, insects and the elements
- Ideal for exterior walls, outdoor kitchens, outdoor showers and accent walls
- Resistant to warping and rot

Accessories

Fasteners & Joist Tape

Aegis™ Clip Plastic Hidden Deck Fastener

Aegis Clip offers a 90-degree installation process and fastener options for use on wood or steel joist systems. The bottom teeth on the clip bite into the grooved deck board to help control the deck board's lateral movement. Glass reinforced polypropylene provides lasting strength and durability.

- Tight fit for added stability
- Pre-inserted screws for easy installation
- Available in high-strength carbon or stainless steel
- Works with wood or metal frames

Metal Hidden Deck Fasteners

Designed specifically for our wood composite boards, these hidden fasteners provide superior holding power that fits securely into grooved profiles. Add to the life of your deck by elevating the boards off the joists to reduce structural rot and mold.

- Secure fit reduces possible moisture buildup
- Available in high-strength carbon or stainless steel
- Installs easily with pneumatic gun or regular drill
- Compatible with wood frames

Joist Tape

Protect every inch of your deck with MoistureShield joist tape. Its patented adhesive and cloth backing seals joists and screws to block moisture. The tape tears easily without tools, can be repositioned without residue, and applies smoothly to any substrate—including lumber and steel.

- Self-sealing and repositionable without residue or sticking to itself
- Easy to tear by hand
- Extends life of wood joists by up to 10+ years
- For application temperatures between -20°F to 200°F (-29°C to 93°C)

COMPLETE THE VIEW IN STYLE

Choose from composite, aluminum and steel systems with customizable options to perfectly complement any deck and home. Each railing system is engineered for low-maintenance durability, so your finished space feels safe and looks polished year after year.
