

MoistureShield Deck Clip

Metal Hidden Deck Fastener

Get the most seamless installation possible with our exclusive hidden fasteners. Designed specifically for all MoistureShield 1" deck boards, these fasteners provide superior holding power that fits securely into grooved profiles and provides consistent 3/16" spacing. Hidden fasteners can even add to the life of your deck by elevating the boards off the joists to reduce structural rot and mold. They're even backed by a Limited Lifetime Warranty against any loose deck boards.

Stainless steel fasteners and clips should be used within 10 miles of saltwater, near large bodies of water, rivers, and pools, near areas using deicing salts, and when they will be exposed to products containing chlorides.

- Easy to install with pneumatic fasteners or screws
- Concealed fasteners create an unblemished deck surface
- Allows joists to completely dry out – reducing structural rot or mold
- Powder coated high strength steel or stainless steel
