

Design Notes:

1. Cross section as shown is suitable for pedestrian use only. Contact local Belgard or MoistureShield Sales Representative for additional information on the Instadeck product.
2. Depth of aggregate base subject to site specific conditions (soil conditions, groundwater levels, climatic conditions). Contact Belgard Commercial for design assistance.
3. Drain pipes may be required within the open-graded aggregate base depending on the permeability of the subgrade soils. Verify drainage needs with the geotechnical engineer. Ensure drain pipes are able to daylight via gravity flow to surface, or connect to a catch basin.
4. Ensure the geotextile has good drainage characteristics, is not prone to clogging and is covering the entire aggregate base.
